Building a Jumia-Grade Multi-Vendor Retail Marketplace

Ecosystem Overview

Core Objective: To build an end-to-end multi-vendor e-commerce marketplace where independent third-party merchants register, list inventory, and fulfill customer orders, while buyers shop effortlessly across Android, iOS, and Web.

4 Apps

PLATFORM SURFACES

Customer iOS & Android App, Web Storefront, Vendor Portal & Admin Console.

Multi-Cart

UNIFIED CHECKOUT

Buyers purchase from multiple distinct merchants in one single transaction.

Auto-Split

COMMISSION ENGINE

Dynamic category percentages deducted cleanly before vendor payouts.

₦850k

TOTAL INVESTMENT

Complete turnkey delivery within 4 to 5 weeks from mobilization.

Product Discovery, Smart Search & Rich Detail Pages

Web & React Native App

01 Multi-Level Categories

- Browse organized departments (Electronics, Fashion, Home & Living, Groceries, Beauty).
- Dynamic side filters for brand, price band, availability, and customer rating.

02 Smart Autocomplete Search

- Real-time instant search bar with typo-tolerant keyword matching.
- Displays recent search history and trending product suggestions automatically.

03 Product Detail Desk

- High-res multi-image gallery with interactive size, color & spec selectors.
- Live stock indicator, verified customer reviews, and merchant storefront badge.

Unified Multi-Vendor Checkout, Local Payments & Tracking

Buyer Conversion

04 Unified Cart & Promo Engine

- Combine products from multiple separate vendors inside a single unified shopping cart.
- Saved delivery address book with auto-calculated shipping fees and coupon code discounts.

05 Local Payments & User Accounts

- Seamless checkout via **Paystack, Moniepoint & Flutterwave** (Cards, Bank Transfer, USSD).
- Full buyer account history, PDF invoice downloads, wishlists, and product rating submissions.

06 4-Stage Visual Order Lifecycle Tracking

1. Order Placed → 2. Confirmed by Vendor → 3. Shipped / En Route → 4. Delivered

Seller KYC Onboarding & Inventory Catalog Manager

Vendor Web / PWA

01 Merchant Onboarding & KYC

- Self-service merchant registration capturing business profile and contact verification.
- Dedicated storefront banner branding and verified Nigerian bank payout account setup.
- Clear onboarding checklist guiding vendors from sign-up to verified store activation.

02 Product & Inventory Manager

- Create, edit, and categorize products with SKU codes, pricing, discount tags, and live stock counts.
- Automated image resizing and compression during upload for ultra-fast mobile storefront loading.
- Low-stock alerts helping vendors replenish top sellers before stockouts occur.

Real-Time Order Fulfillment & Vendor Financial Ledger

Seller Operations

03 Order Processing & Fulfillment

- **Audible Order Alerts:** Instant sound and dashboard alerts whenever a new customer order lands.
- **Step-by-Step Fulfillment:** Vendors advance sub-orders cleanly through `Package Order`, `Ready for Dispatch`, and `Dispatched`.

04 Financial Ledger & Payouts

- **Transparent Earnings View:** Real-time ledger of gross sales, platform commission deductions, and net withdrawable balance.
- **One-Tap Bank Payouts:** Vendors request instant settlement transfers straight to their verified commercial bank account.

Complete Marketplace Control, Commissions & Analytics

Platform Owner Console

01 Merchant Governance & Moderation

- Review, approve, audit, or suspend vendor stores before they sell publicly.
- Global product moderation queue to inspect listings and remove prohibited goods.

02 Dynamic Commission & Batch Payouts

- Set custom percentage rates per category (e.g., 5% Electronics, 15% Fashion).
- Automated revenue splits and streamlined batch vendor payout approvals.

03 Promotions & Banner Manager

- Configure homepage hero sliders, flash sales, and featured categories with zero code changes.

04 GMV & Executive Analytics

- Live visibility into Gross Merchandise Value (GMV), net earnings, daily orders, and top items.

Modern Scalable Engineering Stack (Mobile, Web & API)

Technology Stack

Mobile **React Native (Expo)**

Compiled into native binaries for **Google Android** (`.apk` / `.aab`) and **Apple iOS** (`.ipa`), delivering smooth native shopping, push notifications, and fast image caching.

Web **Next.js 15 + Tailwind CSS**

Powers the SEO-optimized Customer Web Storefront, responsive Vendor Portal, and Master Admin Console with sub-second page transitions.

Backend **Node.js (NestJS) API**

Cloud-hosted order state machine managing multi-vendor cart splitting, payment gateway webhooks, commission math, and payout queues.

Data **PostgreSQL + Cloudflare R2**

Transactional **PostgreSQL** for strict double-entry financial records paired with **Cloudflare R2** for fast, zero-egress product media hosting.

Running & Infrastructure Fees (Paid Direct by Client)

Operational Budget

INFRASTRUCTURE / SERVICE PROVIDER	OPERATIONAL PURPOSE	ESTIMATED INITIAL COST
Cloud Server & Database (Railway)	Runs NestJS backend API, PostgreSQL DB & background queues	**$10.00 - $20.00 / month**
Product Media Storage (Cloudflare R2)	High-resolution product catalogs with zero egress fees	**Free tier / ~$5.00 / month**
Payment Gateway (Paystack / Moniepoint)	In-app local card, USSD & bank transfer settlement	**1.5% capped processing fee**
SMS OTP & Alerts (Termii)	Customer & vendor phone verification and order notices	**Pay-as-you-go (~₦5.00 / SMS)**
Custom Domain & SSL (Cloudflare)	Brand domain name (.com or .ng) with CDN & SSL security	**~$15.00 - $25.00 / year**
Google Play Developer Account	One-time Android app store publishing registration	**$25.00 (One-off fee)**
Apple Developer Program (Optional)	Annual Apple account for direct iOS App Store release	**$99.00 / year (Paid to Apple)**

Development Pricing & 50 / 30 / 20 Milestone Schedule

Investment: ₦850,000

Total Development Investment: ₦850,000 (Eight Hundred and Fifty Thousand Naira) | Project Delivery Timeline: 4 to 5 Weeks
