Validity: 30 Days

COMMERCIAL PROPOSAL & 31-POINT PRE-APPROVAL INTERROGATION RESPONSE

High-Conversion Digital Advisory Platform for Ken-Saleem Consulting Limited

Headless Next.js 15 + Headless CMS Architecture, Paystack & Calendly Conversion Engine, Security & Commercial Terms

PREPARED FOR	PREPARED & OWNED BY	DEVELOPMENT INVESTMENT
Chief Executive Officer, Ken-Saleem Consulting Ltd	**Sales Cowboy Marketing Solutions**	**₦350,000 (Development Cost Only)**

EXECUTIVE SUMMARY

OVERVIEW

Ken-Saleem Consulting Limited operates in an advisory market where institutional credibility, intellectual distinction, and immediate technical competence dictate whether high-net-worth (HNW) decision-makers convert or exit. We do not build static digital brochures; we engineer **high-performance client acquisition engines**. Below is our formal **₦350,000 Commercial Proposal** paired with our point-by-point architectural, security, SEO, and operational responses to your 31-point pre-approval interrogation.

SECTION A: BUSINESS ALIGNMENT & CONVERSION STRATEGY

QUESTIONS 1 - 4

Q1 Conversion Strategy & The 90-Second Rule for HNW Visitors

Corporate board directors do not browse sprawling 15-page menus. The architecture enforces a **frictionless 2-tier qualification funnel**:

- **Seconds 0-15 (Authority Proof):** Above-the-fold hero delivers an unmistakable value proposition, accreditations, and institutional proof metrics.
- **Seconds 15-45 (Problem-Solution Alignment):** Scannable, outcome-driven practice verticals (Strategy, Regulatory Risk, Capital Restructuring) with zero generic jargon.
- **Seconds 45-90 (Qualification & Checkout):** Persistent CTA (*"Book Executive Advisory Consultation"*) opens a gated micro-modal (Revenue, Scope, Budget) before routing to payment and calendar slots.

Q2 Customer Journey Map (Organic Search to Retainer Settlement)

1. High-Intent Organic / AI Search → 2. Ultra-Fast Landing (<1.2s) → 3. Practice Area Case Insight → 4. Audit Qualification Gate → 5. Paystack Retainer Settlement → 6. Calendly Slot + NDPA Intake Memo

Q3 Design Psychology vs. 500 Lagos Competitors

- **Restraint of Authority:** Intentional whitespace, sharp typographic contrast, zero noisy animations.
- **Editorial Boardroom Grids:** Asymmetrical layouts modeled after Financial Times and McKinsey Briefings.
- **Micro-Trust Signals:** Regulatory badges, data-backed case study outcomes, and verified client citations.

Q4 Call-To-Action (CTA) Hierarchy

- **Primary (Conversion):** *"Book Advisory Session"* (header, sticky desktop bar, embedded consultation funnel).
- **Secondary (Nurture):** *"Download Executive Industry Report"* (gated by executive email, role, and phone).
- **Tertiary (Direct Line):** *"Connect via Executive WhatsApp Desk"* (pre-filled context routing via API).

SECTION B: DESIGN, UX & PERFORMANCE [2026 STANDARDS]

QUESTIONS 5 - 9

Q5 Mobile-First & Guaranteed Core Web Vitals

- **LCP (Largest Contentful Paint):** ≤ 1.2 seconds
- **INP (Interaction to Next Paint):** ≤ 100 milliseconds
- **CLS (Cumulative Layout Shift):** ≤ 0.05 (near-zero layout shift)

Q6 Target Load Time on Nigerian 4G Networks

- **Target:** Under **1.2 seconds** on MTN / Airtel 4G.
- **Mechanism:** Next.js Static Site Generation (SSG) + ISR, WebP/AVIF media compression, self-hosted fonts, and Cloudflare Edge caching.

Q7 Design System, Modular Grids, Typography & Color Theory

- **Typography & Grid:** Serif Display Headings (*Playfair Display / Cinzel*) paired with Neo-Grotesque Sans-Serif Body (*Inter / Plus Jakarta Sans*) over a 12-column fluid grid (8pt baseline rhythm).

Oxford Navy (#0A192F - Trust) | Champagne Gold (#C5A880 - Advisory Precision) | Pearl White (#F8F9FA - Contrast) | Slate Charcoal (#1E293B - Legibility)

Q8 Accessibility Compliance (WCAG 2.2 AA)

Semantic HTML5, minimum 4.5:1 text contrast (3:1 headings), full keyboard navigation, screen-reader ARIA attributes, and zero auto-playing media.

Q9 Dual-Spectrum UI/UX Navigation

Plain-language anchors (*"What We Do"*, *"Speak to a Consultant"*) with visual icons for fast clarity, alongside deep executive whitepapers for C-suite diligence.

SECTION C: TECHNOLOGY STACK & HOSTING ARCHITECTURE

QUESTIONS 10 - 14

Q10 Proposed Architecture: Headless Next.js 15 + Headless CMS

- **Why NOT WordPress:** Vulnerable to plugin exploits, database security patches, slow PHP runtime, and heavy maintenance overhead.
- **Why NOT Webflow:** Proprietary lock-in fees, restricted custom webhook processing, and poor support for localized Nigerian payment flows.
- **The Choice (Headless Next.js 15 + Headless CMS):** Edge-rendered speed, zero publicly exposed database, unrestricted API integration, and 5-year modular scalability.

Q11 100% Day-One Asset Ownership

Ken-Saleem Consulting Limited owns every account from Day One: domain registrar, cloud hosting, CMS workspace, GitHub repository, and Figma design files are registered directly under your corporate credentials.

Q12 Edge Hosting, 99.99% Uptime SLA & Backups

Deployed across Cloudflare / Vercel Edge CDN (300+ nodes) with **99.99% Uptime SLA**. Automated immutable daily database snapshots are stored on S3-compatible storage (RTO < 15 minutes).

Q13 Version Control, GitHub CI/CD & Staging Workflow

Local Dev (Git) → Staging (staging.ken-saleem.com) → Client QA Sign-Off → Zero-Downtime Production Push

Q14 Future-Proof REST/GraphQL API Architecture

Decoupled API consumer pre-structured for seamless integration with CRM suites (HubSpot, Zoho), Paystack webhooks, Calendly scheduling feeds, and AI assistants without core rewrites.

SECTION D: SECURITY, NDPA 2023 & DISASTER RECOVERY

QUESTIONS 15 - 18

Q15 Security Hardening Stack

- Automated SSL/TLS 1.3 encryption with strict HSTS preloading.
- Cloudflare Enterprise WAF blocking SQLi, XSS, and bot attacks.
- Automated DDoS mitigation and endpoint rate-limiting.

Q16 NDPA 2023 & GDPR Compliance

- Granular cookie consent gating tracking scripts until opt-in.
- Plain-language Privacy Policy aligned with NDPA 2023 and GDPR.
- Dedicated Subject Access Request (SAR) and Erasure channels.

Q17 Encrypted Storage & DNS Authentication

- Consultation notes encrypted in transit (TLS 1.3) and at rest (AES-256).
- Strict SPF, DKIM, and DMARC DNS setup for inbox deliverability (Microsoft 365 / Google Workspace).

Q18 Incident Response & Instant Rollback

- Real-time automated uptime monitoring with instant alerts.
- Instant DNS rollback to immutable static fallbacks within 120 seconds.

SECTION E: SEO, HEADLESS CMS CONTROLS & AI DISCOVERABILITY (GEO)

QUESTIONS 19 - 23

Q19 Native In-CMS SEO Configuration Suite

- **Global Defaults:** Master sitewide meta titles, descriptions, fallback OpenGraph cards, and verified corporate schema.
- **Per-Page Controls:** Independent editors for Meta Titles, Meta Descriptions (with live character counters), OpenGraph thumbnails, and canonical URLs.
- **Indexing Toggles:** Per-page toggles for `index, follow` vs. `noindex, nofollow` on private briefings or gated reports.

Q20 Generative Engine Optimization (GEO)

Structured for both traditional search (Google, Bing) and AI answer engines (ChatGPT Search, Perplexity, Google AI Overviews) via top-of-article factual executive abstracts and semantic entities.

Q21 Automated JSON-LD Schema Markup

Dynamic Next.js metadata injection for `Organization`, `Corporation`, `Person` (CEO/Partners), `ConsultingService`, `FAQPage`, `BreadcrumbList`, and `Article` schema.

Q22 Indexing Acceleration

Automated XML sitemaps that notify Google Search Console and Bing Webmaster Tools instantly whenever new case studies or whitepapers go live.

Q23 Protection Against Malicious Scrapers

Custom `robots.txt` rules paired with Cloudflare Bot Management allowing verified search crawlers while blocking unauthorized content harvesting bots.

SECTION F: WORKFLOW INTEGRATION, PAYMENTS & LEAD AUTOMATION

QUESTIONS 24 - 26

Q24 Paystack Checkout, Smart Calendly Scheduling & WhatsApp Business API

- **Direct Fee Collection:** Native Paystack checkout supporting debit cards and corporate bank transfers for advisory retainers.
- **Smart Webhook Unlock:** Upon verified Paystack webhook settlement, the embedded Calendly scheduler unlocks automatically, preventing unpaid calendar blocking.
- **Executive WhatsApp Desk:** Floating advisory dispatch widget routing inquiries directly to assigned consultants with pre-filled brief parameters.

Q25 Analytics & Consent Mode v2

Integrated Google Analytics 4 (GA4), Search Console, LinkedIn Insight Tag, and Meta Pixel wrapped in Google Consent Mode v2 to enforce zero pre-consent tracking.

Q26 Lead Qualification & Segmentation

Intake gates score revenue tiers (<$50k, $50k-$250k, $250k+). Sub-threshold inquiries auto-route to whitepapers and newsletters, shielding the CEO's calendar.

SECTION G: COMMERCIAL PROPOSAL, HOSTING COSTS & CONTRACT TERMS

QUESTIONS 27 - 31

Q27. Total Development Investment: ₦350,000 (Three Hundred and Fifty Thousand Naira) | Timeline: **3 to 4 Weeks**
Commercial Clarification: The **₦350,000 fee covers software engineering, UI/UX design, CMS integration, and deployment labor ONLY (development cost)**. Third-party infrastructure costs (hosting, custom domain registration, storage, email, and payment gateway transaction fees) are excluded and paid directly by Ken-Saleem Consulting Limited to providers under your own accounts.

BILL OF QUANTITIES (BOQ) - DELIVERABLE	TECHNICAL DESCRIPTION & FUNCTIONAL SCOPE	STATUS
1. Bespoke UI/UX & Figma System	Executive design system across mobile, tablet, and desktop views with brand typography and palette.	**Included**
2. Headless Next.js 15 Frontend	Mobile-first SSG/ISR application engineered for <1.2s 4G load time and green Core Web Vitals.	**Included**
3. Headless CMS & Native SEO Desk	Intuitive admin portal for publishing case studies, insights, team bios, and full per-page SEO meta tags.	**Included**
4. Paystack + Calendly Retainer Flow	Lead qualification funnel connected to Paystack checkout webhooks unlocking Calendly booking slots.	**Included**
5. Security, DNS & Compliance Setup	Cloudflare WAF, TLS 1.3 SSL, SPF/DKIM/DMARC records, GA4 Consent Mode v2, and JSON-LD schema.	**Included**
Total Development Cost	**Complete Custom Software Design & Engineering Turnkey Delivery (Development Cost Only)**	**₦350,000**

THIRD-PARTY HOSTING, DOMAIN & OPERATIONAL INFRASTRUCTURE COSTS

CLIENT DIRECT ACCOUNTS

Per Question 11 (Day-One Ownership), all third-party hosting and domain accounts are registered directly in Ken-Saleem Consulting Limited's corporate name. Estimated operational costs paid directly to service providers are itemized below:

THIRD-PARTY SERVICE / PROVIDER	OPERATIONAL PURPOSE	ESTIMATED COST (CLIENT DIRECT)
Custom Corporate Domain (.com / .com.ng)	Primary corporate domain name registration and annual renewal	**~₦15,000 - ₦25,000 / year**
Edge Web Hosting (Cloudflare Pages / Vercel)	Global CDN hosting, WAF firewall, DDoS protection & SSL/TLS 1.3	**$0 (Free Tier) / $20.00 per mo (Pro)**
Headless CMS & Database (Sanity / Railway)	Editorial content engine, intake lead records & automated DB snapshots	**$0 (Free Tier) - $15.00 / month**
Cloud Media & Backup Storage (Cloudflare R2)	Executive whitepaper PDFs, encrypted intake backups & zero-egress media	**$0 (Free Tier) / ~$1.00 - $5.00 / mo**
Transactional Email (Resend / Microsoft 365)	Consultation alerts & SPF/DKIM authenticated client email delivery	**$0 (Free up to 3,000/mo) or M365**
Smart Scheduling (Calendly Standard/Pro)	Real-time calendar availability sync & automated meeting invites	**$0 (Basic Free) / $12.00 per seat/mo**
Payment Gateway (Paystack Live Merchant)	Card and bank transfer processing for consultation retainers	**1.5% + ₦100 (capped at ₦2,000/txn)**

MILESTONE PAYMENT SCHEDULE (₦350,000 DEVELOPMENT FEE)

MILESTONE STAGE	TRIGGERING DELIVERABLES	PAYMENT DUE
1. Mobilization Deposit (50%)	Contract signing; covers architectural schema, Figma UI/UX system design, and GitHub/Cloud staging setup.	**₦175,000**
2. Functional Staging (30%)	Delivery of Next.js build, Headless CMS publishing portal, and Paystack/Calendly flows on `staging.ken-saleem.com`.	**₦105,000**
3. Production Go-Live (20%)	Security hardening, Core Web Vitals verification, DNS cutover, staff video training, and IP/NDA handover.	**₦70,000**

EXECUTION TIMELINE, WARRANTY & INTELLECTUAL PROPERTY

QUESTIONS 28 - 31

Q28 Delivery Timeline (3 to 4 Weeks) & Service Commitment

- **Week 1:** Architectural System Plan, Wireframes & Figma UI/UX Review. **Weeks 2-3:** Next.js Build, CMS, Paystack/Calendly Staging. **Week 4:** Security Hardening, SEO/GEO Audit, DNS Setup & Launch.
- **Accountability Covenant:** A **2% contract discount per business day** applies to the final milestone balance in the event of any unexcused delivery overrun attributable to the developer.
- **Content Provision:** Ken-Saleem provides approved copy, bios, and manuscripts; Sales Cowboy provides copy-editing, SEO formatting, and layout engineering.

Q29 & Q30 Hypercare Support & Handover

Includes **90 Days (3 Months) of complimentary Hypercare Technical Support** post-launch (optional retainer afterwards at ₦50,000/mo or ₦15,000/hr ad-hoc). Full super-admin credentials, operations manual, and recorded training videos provided at handover.

Q31 Intellectual Property & NDA Covenant

A formal **IP Assignment & Non-Disclosure Agreement (NDA)** guarantees all custom code, design tokens, and architecture created for Ken-Saleem Consulting Limited remain exclusively yours and will never be reused or resold.
