COMMERCIAL PROPOSAL
Ref: SC-2026-NOV-006
Date: November 11, 2026
Validity: 30 Days

PRODUCT ARCHITECTURE & COMMERCIAL PROPOSAL

Unified Real Estate Value-Chain & PropTech Ecosystem

Cross-Platform iOS & Android Mobile Applications (React Native) + Central Web Operations Console

1. EXECUTIVE SUMMARY & OBJECTIVE

To develop an integrated PropTech ecosystem that addresses systemic inefficiencies, title uncertainty, middleman commission inflation, and fragmented services across the Nigerian property landscape. The solution combines high-performance **React Native mobile applications for iOS and Android** with a unified **Next.js operations management console**.

The platform consolidates five distinct commercial verticals into one streamlined marketplace: direct property sales/lettings, verified shortlets and hospitality bookings, vetted trade artisans, building materials procurement, and an official land title search and verification request desk.

2. FUNCTIONAL SYSTEM SCOPE (SIX KEY MODULES)

Module 1: Property Sales & Lettings (Direct)

- **Verified Property Catalog:** Land, residential flats, duplexes, and commercial spaces with documentation badges (Title Inspected, Direct Mandate).
- **Direct Developer/Buyer Channels:** Direct inquiry and inspection scheduling flow to eliminate multi-layered intermediary commissions.
- **Multi-Parameter Filter Engine:** Filter by State, LGA, neighborhood, price band, property condition, and title type (C of O, Gazette, Deed).

Module 2: Land Registry & Title Verification Desk

- **Digital Intake Engine:** Prospective buyers request pre-purchase land title search and legal coordinate charting.
- **Secure Document Upload:** Upload survey plans, Deed of Assignment, Gazette references, and Governor's Consent documents.
- **Live Tracking Pipeline:** Review progress stages (Received, Registry Search, Coordinate Charting, Report Ready) with PDF download.

Module 3: Vetted Artisans & Maintenance Hub

- **Certified Trade Directory:** Plumbers, electricians, AC/refrigeration technicians, carpenters, painters, and masons.
- **Job Request & Dispatch Flow:** Specify trade, describe fault, upload photos, provide site address, and receive matched artisan profile.
- **Escrow Sign-off & Mutual Ratings:** Dual confirmation on completion and 5-star artisan rating system.

Module 4: Building Materials & Tool Procurement

- **Direct Supply Catalog:** Transparent price listings for cement, rebar, gravel/sand, tiles, electrical wiring, and power tools.
- **Bulk Order Quote & Cart:** Add items, request site delivery freight quotes, and checkout via verified regional supplier hubs.
- **Supplier Dispatch Ledger:** Track order routing, site dispatch, and driver verification.

Module 5: Verified Shortlets & Hospitality

- **Verified Inventory:** High-res photo galleries, 24/7 power, security, Wi-Fi amenity checklists, and nightly rates.
- **Calendar Booking Engine:** Real-time date availability to prevent double-booking.
- **In-App Escrow Checkout:** Automated payment processing with security deposit release.

Module 6: Master Operations Dashboard (Web)

- **Vetting & Accreditation Desk:** Review and verify artisan credentials, supplier price sheets, and host property deeds.
- **Title Workflow Management:** Assign title search requests to surveying partners and upload signed search reports.
- **Consolidated Commercial Ledger:** Commission tracking, dispute resolution, and platform transaction audit trails.

3. TECHNICAL ARCHITECTURE & PLATFORM STACK

LAYER	TECHNOLOGY	CORE PURPOSE
Mobile Applications (iOS & Android)	React Native (Expo / React Native CLI) - TypeScript	Unified native mobile app on Apple App Store (.ipa) and Google Play Store (.apk/.aab) featuring push notifications, camera scanning, and geolocation.
Central Web & Admin Console	Next.js 15, React, Tailwind CSS	High-performance responsive web dashboard for property developers, bulk procurement buyers, and back-office verification staff.
Backend API Engine & DB	Node.js (NestJS) + PostgreSQL	Modular REST API managing listings, booking calendars, escrow workflows, and role-based permissions.
Media & Document Storage	Cloudflare R2 Storage (S3-Compatible)	Zero-egress cloud storage for property photos, title deeds, and artisan identity verification documents.
Payment & Escrow Engine	Paystack / Monnify Gateway	Automated local card processing, virtual bank accounts, instant payment webhooks, and escrow settlements.

4. THIRD-PARTY INFRASTRUCTURE & OPERATIONAL COSTS

INFRASTRUCTURE / SERVICE	PURPOSE	ESTIMATED INITIAL COST
Cloud Server & DB (Railway)	Runs backend API, database, and background queues	**$10.00 - $20.00 / month**
Media Storage (Cloudflare R2)	High-resolution property photos and deed uploads	**Free tier / ~$5.00 / month**
Custom Domain & Managed SSL	Brand domain name (.com or .ng) with Cloudflare CDN	**~$15.00 - $25.00 / year**
SMS OTP & Alerts (Termii)	User phone verification and transaction notifications	**Pay-as-you-go (~₦5.00 per SMS)**
Apple Developer Program	Annual iOS App Store distribution account	**$99.00 / year**
Google Play Developer Account	One-time Android Play Store publishing account	**$25.00 (One-off fee)**
Payment Gateway Processing	In-app payment collection via Paystack/Monnify	**1.5% capped local processing fee**

5. COMMERCIAL INVESTMENT & MILESTONE PAYMENT SCHEDULE

Total Development Investment: ₦850,000 (Eight Hundred and Fifty Thousand Naira) | Project Timeline: **4 to 5 Weeks**

MILESTONE STAGE	DELIVERABLE SCOPE	FEE BREAKDOWN
1. Mobilization Deposit	System architecture, database schema design, and complete UI/UX interface layouts for React Native mobile apps and web console.	**50% (₦425,000)**
2. Functional Staging Milestone	Delivery of property listings, title request intake, service booking flows, materials catalog, and mobile staging builds (iOS/Android TestFlight/APK).	**30% (₦255,000)**
3. Production Handover	Production cloud deployment, custom domain setup, live payment gateway integration, app store submission packages, and administrative handover.	**20% (₦170,000)**

6. POST-LAUNCH TECHNICAL WARRANTY & SUPPORT

Sales Cowboy Marketing Solutions provides **30 days of comprehensive post-launch warranty support** covering bug remediation, calculation integrity checks, server monitoring, and administrative onboarding at zero additional cost.

7. PROJECT ACCEPTANCE & AUTHORIZATION
