COMMERCIAL PROPOSAL
Ref: SC-PROP-2026-FLEET
Date: November 10, 2026
Validity: 30 Days

PRODUCT ARCHITECTURE & COMMERCIAL PROPOSAL

Fleet Tracking & Dispatch Management Platform

Driver & Rider Mobile Tracking App (Android & iOS via React Native / Expo) + Master Web Control Dashboard (Next.js)

1. EXECUTIVE SUMMARY & OBJECTIVE

To develop a streamlined, lightweight logistics tracking and dispatch system for transport and courier operations. The system turns the rider or driver's smartphone into a live GPS tracker via a dedicated mobile app streaming coordinates in the background.

Dispatch managers retain live visibility and control via a central web dashboard, allowing them to monitor active routes, assign delivery jobs, and manage driver operational status in real time.

2. FUNCTIONAL SYSTEM SCOPE

Module 1: Driver & Rider Mobile App

- **Shift Toggle & Login:** Simple driver authentication with one-tap Start Shift (Online) and End Shift (Offline) toggle.
- **Background GPS Streaming:** Transmits real-time coordinates (latitude, longitude, speed, heading) with battery and data optimization.
- **Assigned Delivery Tasks:** Clean task list showing pending pickups, customer phone contact, and drop-off points with one-tap calling.
- **Task Progression:** Accept Task → Arrived at Pickup → En Route → Delivered.
- **Turn-by-Turn Navigation:** One-touch handoff opening Google Maps or Apple Maps directly to delivery coordinates.

Module 2: Master Web Control Dashboard

- **Live Fleet Tracking Map:** Interactive map (Leaflet / OpenStreetMap) showing all active riders, live vehicle coordinates, and status (Available, Busy, Offline).
- **Vehicle Marker Inspector:** Click on any marker to inspect driver identity, speed, battery level, and assigned order reference.
- **Dispatch & Task Assignment:** Create delivery jobs with pickup/drop-off addresses and assign manually to the closest available rider.
- **Driver Master Directory:** Register and manage rider profiles, vehicle types, and license plate records.
- **Trip History & Logs:** Searchable archive of past deliveries, completion timestamps, and delivery proof records.

3. PROPOSED TECHNICAL ARCHITECTURE

LAYER	TECHNOLOGY	CORE PURPOSE
Mobile Tracking App	React Native (Expo) - Android & iOS	Low-memory mobile app compiled into native Android (.apk) and iOS (.ipa) with background geolocation services.
Fleet Control Dashboard	Next.js 14, React, Tailwind CSS	Fast desktop/tablet dispatch portal featuring live tile rendering and instant vehicle status filtering.
Backend & Real-Time Sync	Node.js (NestJS) + WebSockets	Bi-directional WebSocket connection broadcasting rider coordinates to the dashboard map in real time without page refreshing.
Database & Coordinate Cache	PostgreSQL + Redis	PostgreSQL for delivery records and driver profiles paired with Redis for sub-second location coordinate caching.

4. THIRD-PARTY INFRASTRUCTURE & OPERATIONAL COSTS

INFRASTRUCTURE / SERVICE	PURPOSE	ESTIMATED INITIAL COST
Cloud Server & DB (Railway)	Runs backend API and real-time socket listeners	**$5.00 - $10.00 / month**
Custom Domain & SSL Protection	Brand domain name (.com or .ng) with managed SSL	**~$10.00 - $20.00 / year**
Mapping & Routing APIs	OpenStreetMap / Leaflet tile infrastructure	**$0.00 (Free baseline tier)**
Google Play Developer Account	One-time Android publishing fee to Google	**$25.00 (One-off fee)**
Apple Developer Program Account	Annual membership required to publish directly to iOS App Store	**$99.00 / year (Paid to Apple)**

5. COMMERCIAL INVESTMENT & PAYMENT SCHEDULE

Total Development Investment: ₦750,000 (Seven Hundred and Fifty Thousand Naira) | Timeline: **3 to 4 Weeks**

MILESTONE STAGE	DELIVERABLE SCOPE	FEE BREAKDOWN
1. Mobilization Deposit	React Native setup, database schema, map server bridge, and UI/UX interface design.	**50% (₦375,000)**
2. Functional Staging Milestone	Driver app background GPS tracker, live dispatch map, and order creation flow on staging.	**30% (₦225,000)**
3. Production Handover	Production app builds (Android & iOS), live web dashboard deployment, domain setup, and administrative onboarding.	**20% (₦150,000)**

6. POST-LAUNCH WARRANTY & SUPPORT

Sales Cowboy provides **30 days of complimentary technical warranty support** covering bug resolution, socket connection optimization, and operational training.

7. PROJECT ACCEPTANCE & AUTHORIZATION

FOR: SALES COWBOY (DEVELOPER)

Lead Systems Architect
Sales Cowboy Marketing Solutions

FOR: LOGISTICS & FLEET TRANSPORT ENTERPRISE

Authorized Executive Representative
